

TAMPA BAY DIVISION ANNOUNCES....

By Stan Kotas

Tampa Bay announces a partnership with MOSI. The Museum Of Science & Industry, which is the 5th largest science center in the country, and the Tampa Bay Division will embark on a continuing program of varied seasonal displays at the museum located at 4801 E. Fowler Ave. in Tampa.

The first of these displays will be from Dec. 1st through Dec. 7th. This display will depict a holiday theme and will be located in the entryway to Kids In Charge! at MOSI. With a total of 40,000 square feet, including 25,000 square feet of exhibit space, Kids In Charge! is the largest children's science center in the Nation. The display will be staffed for operations during normal museum hours of 9-6 on weekends and 9-5 week days.

This represents a unique opportunity for the FGRS as people from all over the state visit the museum. We can educate on the subject of large scale model railroading in general and garden railroading in particular. We can promote, through membership in the FGRS, the fun and excitement of a family hobby. Look for further info on this project in future issues of the FGRS Newsletters. For further information please contact Bruce Boyle at 727.449.1589 or Stan Kotas at 813.689.0461.
